Iconic Week from 4th to 10th October, 2021

Campaign Against Single Use Plastic

Invited Popular Talk

By

Padma Shri Prof Rajagopalan Vasudevan

On Wednesday, October 6, 2021 (3-4 pm)

About the Speaker:

Professor R Vasudevan is a retired chemistry professor from the Thiagarajar Engineering College in Madurai. He was awarded the Padma Shri, the government's fourth highest civilian honour in 2018. He is known as the "Plastic Man of India" for devising an innovative way of disposing of plastic waste – by using it to build roads.

In 2002, Professor Vasudevan came up with the idea of spraying dry, shredded plastic waste, made up of pieces as small as 2 mm in size, over gravel or bitumen heated to 170 degrees Celsius. The plastic melted and coated the stones with a thin film. The plastic-coated stones were then added to molten tar. Since both plastic and tar are petroleum products, they bind well. Vasudevan first tried out this technique to pave a road on the college campus. It yielded twin benefits: it reused plastic waste and built durable roads.

Padma Shri Prof R Vasudevan
